

# What is MIS-C?

## Multi-System Inflammatory Syndrome in Children

- Inflammatory condition that impacts a child's organs (heart, digestive system, skin (rashes), brain, eyes, blood vessels) after SARS-CoV-2.
- Most severe in children older than 6 years old.

Territories AS FM GU MH MP PR PW VI

10-year-old West Michigan boy undergoes four amputations after developing MIS-C, a rare illness that can emerge after kids catch coronavirus:

### National Totals:
