

Racial Disparities in Pediatric Hospitalization Rates

According to national CDC estimates from the summer, black and Hispanic or Latino children are disproportionately affected by severe COVID-19 leading to hospitalization.

Kim L, et al. Hospitalization Rates and Characteristics of Children Aged <18 Years Hospitalized with Laboratory-Confirmed COVID-19 – COVID-NET, 14 States, March 1-July 25, 2020. MMWR. August 14, 2020 / 69(32);1081-1088.
